Mohith Seelam

Data & AI Enthusiast | Developer | 2 x Hackathon Winner

seelammohith2222@gmail.com | +91-79812 32166 | Portfolio | Seelam-Mohith | mohith-seelam | Leetcode

Summary

Computer Science undergraduate with strong foundations in Data Structures & Algorithms, DBMS, programming, and problem solving, with hands-on experience in Python, SQL, Machine Learning, and Generative AI. Built data-driven applications using **RAG pipelines, LLM APIs, embeddings, vector stores, data processing, REST APIs, and machine learning**, with a strong interest in AI-assisted data engineering and automation.

Education

Chaitanya Bharathi Institute of Technology (CBIT) CGPA: **8.62**
B.Tech in CSE (IoT, Blockchain & Cyber Security) 2023 – 2027

Technical Skills

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Problem Solving
Languages: Python, SQL, JavaScript, Java
Data Engineering & AI: Data Processing, ETL Concepts, Data Validation, Data Analysis, Machine Learning, NLP
GenAI & LLMs: RAG Pipelines, LangChain, Prompt Engineering, LLM APIs, Embeddings, Vector Stores, Vector Search
Databases, APIs & Tools: MongoDB, MySQL, REST APIs, Git, GitHub, Streamlit, Flask, FastAPI, scikit-learn

Projects

ScholarChat AI | *Python, Streamlit, LangChain, Gemini, RAG*

- Built a **RAG-based document intelligence system** that processes documents, generates embeddings, and retrieves relevant contextual data for LLM-powered question answering.
- Integrated **LangChain, LLM APIs, embeddings, and vector stores** to build reusable data processing and retrieval workflows with efficient contextual search.

TradeDNA | *React, Python, FastAPI, Machine Learning*

- Built a quantitative data analysis platform using **Python** to ingest, transform, analyze, and backtest historical market data using technical indicators.
- Developed structured **FastAPI-based data APIs** and analytical workflows for processing datasets, calculating quantitative metrics, and presenting strategy insights.

NexSOAR | *Python, Machine Learning, ELK, MITRE ATT&CK*

- Built a data-driven threat detection platform combining **supervised and unsupervised ML** to analyze network data, identify anomalies, and prioritize incidents.
- Implemented automated data analysis, **MITRE ATT&CK mapping**, SHAP-based explanations, and reusable workflows for security monitoring and anomaly investigation.

Experience & Leadership

Mitt Arv May 2026 – June 2026
Software Development Intern

- Developed AI and MERN applications using **React**, **Redux**, and **Jira** in an Agile development environment.
- Built and enhanced **features** for HR Management and Project Management platforms using React and Redux.

CBIT Open Source Community 2024 – Present
General Secretary

- Led the successful organization of a hackathon with **1700+ participants** across **350+ teams**.
- Designed Git and Full-Stack workshops while developing the HackWeek portal used by **900+ students**.

Achievements & Certifications

- **Winner (1st Place)** – VNRVJIET Krithathon 2025 (1200+ participants)
- **Winner (2nd Place)** – CBIT Hacktoberfest 2024 (1000+ participants)
- **Solved 250+ Data Structures & Algorithms problems** on LeetCode, strengthening algorithmic problem-solving.
- **Oracle OCI 2025** – Data Science Professional **Oracle OCI 2024** – Generative AI Professional
- **NPTEL** – Practical Cybersecurity **IBM** – Artificial Intelligence Fundamentals
